To: Valued TEG 6s Customers

Re: **Safety Data Sheets -SDS** (previously called Material Safety Data Sheets- MSDS)
not required for TEG 6s Cartridges

At Haemonetics the health and safety of our customers is of paramount importance. We have consulted with an external SDS authoring source and our internal Environmental Health and Safety experts about providing SDS documents for TEG 6s cartridges. We have determined that an SDS is not required because the total reagent weight does not exceed 0.1% of the total product weight.

The TEG 6s cartridges contain very small amounts of reagent that do not meet or exceed this threshold. All reagents are encapsulated within the cartridge, and customers can not be exposed to the reagents at any point in time.

This means that TEG 6s cartridges do not require SDS sheets.
