

EIDorado Donor[®]

A configurable solution for safe, accurate and efficient blood center management

EIDorado Donor, a complete blood management system, can help blood centers of all sizes:

- Streamline operations and reduce waste
- Meet donor and patient safety regulations
- Deliver quality blood products to meet demand

SOFTWARE SOLUTIONS

What's new in the EIDorado Donor 2.2 release

- More automation to help optimize resources
- Increased manufacturing efficiencies to help lower costs
- Enhanced functionality to address emerging regulations
- Extended configurability for added site-defined processes

Create and order custom test profiles for non-routine donor tests (Chagas Disease, CMV, bacterial testing, Parvovirus and others) to address emerging standards.

Why migrate to the EIDorado Donor® Solution?

Modern technology platform, designed to meet blood center needs today, tomorrow and into the future. The EIDorado Donor System can help blood centers:

Increase efficiencies and reduce waste

- Minimize waste caused by errors or incomplete information
- Create site-defined processes and testing to respond to changing regulations
- Improve traceability by tracking component license status from collection to release
- Leverage pre-donation testing for collection-type suitability
- Print ISBT 128 labels for components and recovered plasma on-demand

Optimize resources and streamline workflow

- Easy-to-use interface simplifies navigation, data collection and tracking
- Save time by performing multiple tasks on a single page
- Find donor and component information quickly using at-a-glance bars
- Link to site-specific SOPs and forms for immediate access to procedures
- Access donor information to streamline mobile drive registration and eligibility checks

Meet donor and patient safety requirements

- Calculate and track blood loss based on site defined eligibility criteria
- Post deferrals for tests, medication, and travel automatically
- Order selective tests based on emerging standards (e.g. Chagas Disease, CMV, others)
- Perform system safety checks prior to labeling and release
